

Custom Equipment Design, Inc. Continues Operations as Part of Essential Critical Infrastructure Workforce.

Consistent with **Guidance on the Essential Critical Infrastructure Workforce** put out by the Cybersecurity and Infrastructure Security Agency (CISA) of the U.S. Department of Homeland Security, Custom Equipment Design, Inc. (CED) has, and will continue normal operations, with appropriate modifications to account for Centers for Disease Control (CDC) workforce and customer protection guidance.

CED is constantly monitoring developments of the COVID-19 crisis and continues to take steps to mitigate the spread of the disease by:

- Creating a safe and hygienic environment by facilitating daily wipe downs, disinfecting and sanitizing of offices, work areas and worksurfaces.
- Enabling and reminding all employees to follow basic personal hygiene measures relevant to this virus, such as regular handwashing and staying home if feeling sick.
- Enforcing distancing procedures at work.
- Spreading out employee workspace locations to facilitate distancing requirements.

Sincerely,

Sandra DeCrane
President
Custom Equipment Design, Inc.
